PromiseLoop Brand Guide

Nov 6, 2026 · @G1- Zion Levi

Brand essence

PromiseLoop is the calling-team platform that turns unpaid jobs into kept promises and confirmed payments, for US field-service businesses.

The name. Every account runs the same loop: call → promise to pay → follow-up → confirmed paid. PromiseLoop names that loop and the act of closing it. We sell the outcome (promises kept), not the effort (calls made).

Element	Statement
Brand promise	Every promise, followed through.
Positioning	For HVAC, plumbing and electrical owners who are owed money but can't chase it, PromiseLoop is the calling team and software that gets customers to commit and pay. Unlike collection agencies, we protect the customer relationship.
Primary audience	US contractor owners and office managers (client side)
Secondary audience	Ops managers, supervisors and agents on the calling team
Personality	Calm, precise, fair, quietly confident
Not	Aggressive, threatening, flashy, "debt collector"

Brand architecture. PromiseLoop is the company and product brand. "APO" stays as the internal codename and repo name (`apo-collections-mvp`) until the rename lands in the app.

Voice and messaging

We sound like a steady office manager who gets results: plain words, real numbers, no pressure.

The loop rule. "Loop" always means *closing* the loop, never calling around in circles. Write "close the loop", "loop closed", "every promise followed through". Never "keep looping", "loop them in again" or anything that hints at repeated calls.

Tagline: Every promise, followed through.

Use	Line
Homepage hero	Close the loop on every unpaid job.
Sub-headline	A trained calling team and a simple dashboard that turn past-due invoices into promises, and promises into paid.
Ad / social	You did the job. We'll close the loop.
Sales email subject	Your unpaid jobs, followed through
Payment confirmed (in-app)	Loop closed. $1,284.50 confirmed paid.
Proof line	Numbers over adjectives: "68% of this month's goal recovered"

Say	Don't say
Account, customer, unpaid job	Debtor, delinquent, deadbeat
Promise to pay, follow-up	Chase, hunt, pursue, pressure
Confirmed paid	Collected, recovered by force
Calling team	Collectors, agents of the creditor
Protect the customer relationship	Scare them into paying

Tone rules (match the app copy rules): sentence case, verbs on buttons, numbers over adjectives, no exclamation marks, no emoji.

Color palettes

Use Palette A, "Greenback": it reads as money and trust at a glance, and every text pairing below passes WCAG AA. Palettes B and C are alternates if you want a more banking or more fintech feel.

Palette A — Greenback (recommended)

Inspired by US banknotes: deep note green, fresh mint, cotton-paper off-white, a touch of coin gold.

Token	Name	Hex	Role	Contrast
`--brand`	Greenback	#0B3D2E	Logo "Promise", headings, primary buttons, dark sections	11.1:1 on Paper
`--mint`	Promise Mint	#1FAA70	Logo symbol, "Loop", icons, charts, success fills	2.7:1 on Paper: graphics and large text only
`--mint-ink`	Mint Ink	#157A50	Mint as text and links; button fill with white text	4.9:1 on Paper, white on it 5.3:1
`--paper`	Banknote Paper	#F6F4EE	Page background	—
`--ink`	Ledger Ink	#14161B	Body text and numbers	16.5:1 on Paper
`--gold`	Coin Gold	#C9A227	Rare accent: highlights, badges, "goal hit" moments	5.0:1 on Greenback; never as text on Paper (2.2:1)

Ratio of use: about 60% Paper, 25% Greenback and Ink, 10% Mint, under 5% Gold.

Palette B — Vault (banking feel)

Navy and brass, like a bank vault. Closest to the app's current navy (#1D3B6F), so the smallest change for the UI.

Name	Hex	Role
Vault Navy	#13294B	Primary, headings (13.3:1 on Linen)
Cleared Green	#16A34A	Paid / success (graphics; 3.0:1 on Linen)
Brass	#B8893B	Accent on navy (4.6:1)
Linen	#F7F5F0	Background

Palette C — Fresh Mint (fintech feel)

Brighter and younger, like a modern payments app. Riskier: mint-heavy brands are common in fintech.

Name	Hex	Role
Deep Teal	#0E3B43	Primary, text (11.4:1 on Cloud)
Mint	#00B386	Accent, graphics (2.5:1 on Cloud)
Coin Yellow	#F2C14E	Highlight on teal (7.3:1)
Cloud	#F5F8F7	Background

Status colors (all palettes)

Status colors stay separate from brand colors so meaning never depends on the brand. Confirmed paid = Mint, Promised = Gold, Waiting for client = Ink at 60%, Disputed = muted rose (#B4534B), never bright red. A missed promise is a fact, not an alarm.

Typography

One family, two weights: **Manrope** for the logo and headings, **Inter** for UI and body text. Both are free Google Fonts and available in Canva.

Use	Font	Weight	Size (web)
Wordmark	Manrope	700 Bold	Logo only, never retyped
H1 hero	Manrope	700 Bold	48–56 px, line height 1.1

Use	Font	Weight	Size (web)
H2 section	Manrope	600 Semibold	32 px
H3	Inter	600 Semibold	20 px
Body	Inter	400 Regular	16 px, line height 1.6
UI labels, buttons	Inter	500 Medium	14 px
Money and numbers	Inter, tabular figures	600 Semibold	Match context

Always turn on tabular figures (`font-variant-numeric: tabular-nums`) for dollar amounts so columns line up like a ledger. Max 2 weights per screen.

Logo

The mark is an open mint ring that closes with a Greenback check: the loop, closed. The wordmark sets "Promise" in Greenback and "Loop" in Promise Mint, so the name reads as two ideas joined.

First concept in Canva (3 pages of variations): PromiseLoop logo variations

Version	Use
Horizontal lockup (symbol + wordmark)	Website header, email signature, decks
Stacked lockup	Square spaces, social profile banners, print
Symbol only	App icon, favicon, avatar, loading state
One-color Greenback	Fax, stamps, single-color print
Reversed (Paper on Greenback)	Dark sections, footer

Clear space: keep empty space around the logo equal to the height of the check.
Minimum size: symbol 16 px, horizontal lockup 120 px wide.

Do

- Use the supplied files; never retype the wordmark
- Place on Paper, white or Greenback only
- Keep the ring open with the check sitting in the gap

Don't

- Stretch, rotate or add shadows and gradients
- Recolor "Loop" in gold or any non-brand color
- Add a dollar sign, coin or phone to the mark
- Close the ring into a full circle (it loses the "closing" idea)

Before launch: have the final mark rebuilt as a vector (SVG) so the ring, check and letter spacing are exact, then export the app icon at 16, 32, 180 and 512 px.

Concept preview:

Email domains and sender setup

Use promiseloop.com for people and sales, and keep customer-facing notices on a separate subdomain so a spam complaint never touches the main domain.

Address	Domain	Who reads it
hello@promiseloop.com	Main	Inbound leads, website contact

Address	Domain	Who reads it
team@promiseloop.com	Main	Client success, onboarding
firstname@promiseloop.com	Main	Staff, sales outreach
updates@mail.promiseloop.com	Sending subdomain	Notices to clients' customers
receipts@mail.promiseloop.com	Sending subdomain	Payment-confirmed notices
no-reply@notify.promiseloop.com	System subdomain	App alerts, password resets

Sender name: "PromiseLoop" for client emails. For customer notices, show the client's business name first, for example "Lone Star HVAC billing", with PromiseLoop in the footer.

Setup checklist

- [ ] Buy promiseloop.com, plus promise-loop.com and promiseloop.io to protect typos
- [ ] SPF, DKIM and DMARC on every sending domain before the first send
- [ ] Start DMARC at `p=none`, move to `p=quarantine` after 2 clean weeks
- [ ] Warm up the sending subdomain slowly (small daily volume first)
- [ ] One-click unsubscribe on marketing email
- [ ] Signature: logo, name, role, phone, "Every promise, followed through."

Compliance guardrails

The brand must never make a call or message look like something it isn't. These rules come from the FDCPA and the CFPB's Regulation F; have a US collections attorney confirm them before launch (this guide is not legal advice).

Rule	What it means for the brand	Source
Use the true business name	If agents say "PromiseLoop" on calls, register it as the company's legal name or DBA	FDCPA §1692e(14)
No debt words on envelopes	Keep "debt" and "collection" out of the name, logo and sender fields; PromiseLoop already does	FDCPA §1692f(8)

Rule	What it means for the brand	Source
No false authority	No badges, seals, gavels, flags or "legal department" styling in the logo or templates	FDCPA §1692e(1), (3)
Mini-Miranda stays	Every first contact keeps the required disclosure; brand copy never replaces it	FDCPA §1692e(11)
Opt-out in every email and text	A clear unsubscribe line in the footer of every customer-facing message	Reg F §1006.6(e)
No pressure language	"Closing the loop" never implies repeated calls; call limits (7 calls in 7 days) are product rules, not marketing claims	Reg F §1006.14(b)

First-party vs third-party. If the team calls in the client's name ("on behalf of Lone Star HVAC"), the client's name leads every script and email; PromiseLoop appears only as the platform. Decide this per client and keep it consistent.

SEO and launch checklist

The exact name has no commercial competitor in search, so the brand term ranks fast; category traffic comes from pages built on buyer terms.

Target term	Page
promiseloop (brand)	Homepage
promise to pay tracking	Feature page: Promises
collections for HVAC companies	Industry page: HVAC
collections for plumbing and electrical contractors	Industry pages
unpaid invoice calling service	Service page: Calling team
ServiceTitan / Jobber collections integration	Integration pages

- [ ] Buy promiseloop.com and confirm it isn't parked (the name search showed only hobby code projects, like this GitHub repo)
- [ ] USPTO trademark search for PromiseLoop in classes 9, 35 and 42

- [ ] Register PromiseLoop as the legal name or DBA
- [ ] Claim @promiseloop on LinkedIn, X, Facebook and YouTube
- [ ] Homepage title: "PromiseLoop — Collections calling for contractors"
- [ ] Rebuild the logo as SVG; make favicon and app icon
- [ ] Swap the app palette from the current navy to Greenback tokens
- [ ] Rename "APO" to PromiseLoop in UI copy, emails and the marketing site
